You got it. This is it. Do I need to write Peg? Same accounting info as last time I presume.

Karen, our contact for Bristol Bay is Rick Parkin. I will cc him here and also give you his number so you can provide some background for him in order to help determine whether it makes sense for someone doing Bristol Bay work should participate.

Rick is in Sr. Mgmt in our Seattle office and can be reached at 206-553-8574.

Thank you for thinking of us in this context.

Subject: EPA's Bristol bay initiative

Hi Jackie,

Should we be asking whomever is heading up the new Bristol Bay assessment for EPA to attend our Science Workshop? I think we can make that happen if there is interest. It seems that this is an opportunity for EPA and the LCC to dove-tail work since they are both in the early initiation stages. I'm not exactly sure what that means, except it seems like sharing the ideas/priorities expressed in the workshop and perhaps trying to coordinate any of the Bristol Bay relevant proposals that we receive might make sense. If there are already a list of priorities for that assessment it would be good for us to have those at the workshop so they can be raised (if it doesn't happen without prompting).

Let me know what you think. I will try and get back to you on the Human, Climate and Ecosystems (or something) group later today!

thanks,
Karen
